

# Reduce Complexity. Increase Insight. Cisco Network Security.

We Sell  
Cisco

## Own your security — don't let the hackers own you.

Cyber attacks are big business and only getting bigger. Effective security helps protect you against a breach's far-reaching effects, including: lost business, assets and productivity; fines, litigation and regulation; as well as remediation costs.

## Advanced defenses for advanced attacks

Attacks will continue to evolve as will the IT environment you need to protect. Block more threats and quickly mitigate those that do breach your defenses with the industry's first threat-focused Next Generation Firewall.

**Cisco Firepower NGFW** appliances combine Cisco's proven network firewall with the industry's most effective next-gen IPS and advanced malware protection. All so you can get more visibility, be more flexible, save more, and protect better.

# How can you ever win the battle against cyberattackers?

With Cisco. They fight the digital menace for you with simple security, so you can innovate and grow.

## Only with Cisco can you...

### See more with Firepower Management Center

Know what's happening across your entire network. Use global threat intelligence to make better decisions, faster.

### Protect better with threat-focused next-generation firewall appliances

Stop threats before, during, and after attacks. Extend security everywhere across more attack vectors.

### Respond faster with Rapid Threat Containment

Automate security, even after attacks, across physical, virtual, and cloud to reduce complexity and quickly remediate attacks.

We Sell  
Cisco

Make sure the NGFW you select provides tightly integrated, multi-layered threat protection. By sharing context and intelligence among security functions you accelerate threat detection and response across your organization, and get the most from your investments.

#### Integrated Threat Defense

Get actionable, multi-layered protection.

#### Actionable Indicators of Compromise

Accelerate malware detection to mitigate risk.

#### Comprehensive Network Visibility

Increase security effectiveness with a holistic view.

#### Reduced Complexity and Costs

Unify security layers and automate for efficiencies.

#### Integration with Third-Party Solutions

Maximize existing security investments.
